Studio 5000 Logix Designer Level 1: CompactLogix Fundamentals and Troubleshooting

Course Purpose:

This 16 Hour (2-Day) course will assist students in developing and building a solid foundation with a fundamental knowledge of Logix5000 systems. Students will be introduced to Logix5000 system components and functionality and will have an opportunity to use Studio 5000 Logix Designer application to perform basic system configuration tasks.

Objectives:

After completing this course, students should be able to perform the following tasks:

- Understand CompactLogix system components
- Select and connect to industrial networks in a Logix5000 system
- Download and go online to a Logix5000 controller
- Operate the Logix Designer application
- Configure local I/O modules
- Create tags and monitor data in a Logix Designer project
- Draft basic ladder logic for a Logix Designer routine
- Select basic ladder logic instructions for a Logix Designer routine
- Enter ladder logic components in a Logix Designer routine
- Locate CompactLogix system components, I/O Tags, and devices in a Logix5000 system

Prerequisites:

- Experience operating a computer within a Microsoft Windows environment
- Previous experience with common industrial control system concepts

Course completion will result in a Certificate of Competency

Location: Northwest State Community College
